2010-2011 Tuition Payment Amounts

(excluding applicable fees)

Because a different tuition amount is charged for students in grades 7-12, this chart has been developed to help you determine the tuition amount. The left column is for the number of students in the family. For example: If a family has one child in the elementary grades and one student in the high school, then the fourth row would be selected. This shows a total tuition amount of \$7,180.00. You will notice that each of the possible combinations of student enrollment and payment plans has been calculated.
